

I am urging the FCC to reject the NAB's petition 04-160. XM radio is the best thing that has happened to radio broadcasting. It provides a variety of programs in areas where variety is limited. The quality is unexcelled via any other media. As a senior citizen who desires something other than the trash that the FCC allows on TV and the limited variety of programs on am or fm radio, please reject this petition. We the subscribers are willing to pay for this service and I am appalled that such a petition is being presented. Let the am and fm stations provide quality programs and availability and perhaps they want be trying to hinder yet another media from succeeding.

Yours truly,           An honest American who would like to be allowed to choose what I listen to.

Judy Dennis
